

**ARE YOU FEELING  
THE HEAT OF  
DEALING WITH  
HOT SILAGE  
OR POOR  
QUALITY  
HAY?**

**LET**

**HELP YOU...**

- Keep your silage cooler, longer**
- Improve the quality of your forages**
- Lower your feed costs through improved feed efficiency**
- Provide an excellent Return on Investment**

**Silo Guard® II can help you accomplish these goals!**

**But don't just take our word for it -  
here are some examples of what actual Silo Guard II users are saying...**

Thomas, Patrick & Geoff Farrell

**" I used Silo Guard II on my first and second cut hay this year. The hay looks green and smells fresh. There are no signs of mold, dust or heating in the hay, unlike hay from past years. It gives me peace of mind to know that my hay is protected with Silo Guard II.**

**Last year we used Silo Guard II on our haylage. The haylage smelled good and was always fresh coming out of the open top silo. We noticed that the T.M.R. in the cows mangers was always cleaned up.**

**We will continue to use Silo Guard II based on the great results we have seen this year, especially considering the type of weather we had to work with."**

Geoff Farrell  
Farritage Farms  
Kincardine, ON

**"We have been using Silo Guard II for two years now. We like Silo Guard II because it does the job it is supposed to do. It leaves the corn silage feeling cool and smelling fresh.**

**We left our haylage silo sitting uncovered for three weeks to allow it to ferment. When it came time to feed the haylage we noticed very little spoilage and it was cool to the touch and smelled fresh.**

**With the results we have seen, we will definitely keep using Silo Guard II."**
